

Dear Hiring Manager,

I am excited to apply for the Associate Application Support Engineer position at Lighthouse. With a background in full stack web development and experience in providing technical support, I am eager to contribute to your team and help ensure the smooth operation of your software applications.

During my time as a Junior Full Stack Web Developer Student at LEARN Academy, I developed strong technical skills in both front-end and back-end development. My experience includes troubleshooting, optimizing application performance, and collaborating with cross-functional teams to deliver high-quality software solutions. I am confident that my technical background and problem-solving abilities make me a strong fit for this role.

In addition to my development experience, I have a strong commitment to providing excellent customer service. My ability to communicate complex technical concepts to non-technical audiences has been crucial in my previous roles, and I am eager to bring this skill to the Lighthouse team.

I am particularly drawn to Lighthouse because of your commitment to innovation and collaboration. I am excited about the opportunity to contribute to a team that values growth and the development of its members. I am confident that my background and skills align well with the requirements of this position, and I am eager to contribute to the continued success of your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and skills can contribute to the success of Lighthouse.

Sincerely,

Chantel Carter
